

LEBANESE AMERICAN UNIVERSITY

Electrical and Computer Engineering Dept

COE 201 Computer Proficiency

Fall 2017

Assignment 3

Requirements:

You are required to collaborate with a partner to prepare a short presentation about one of the following topics in the computer and technology field:

- Intel multicore processors.
- NVidia graphics cards.
- Microsoft's Windows 10 operating system.
- Linux's Distros operating system.
- Android smartphone operating system
- iOS operating system for apple devices
- Samsung S generation.
- Any related topic, provided that you need to inform me about it by email.

The presentation should include an introduction, a brief history of this technology, and some of its important features summarized in a clear way. The presentation should also include a comparison with that technology's competitor.

You will be graded based on the following:

- Length of the presentation: It should be at least 20 slides and should not take more than 10 minutes.
- The use of pictures, tables, and graphs.
- The use of animations (Do not overdo it!)
- The use of slide transitions.
- Value and coherency of presentation content.
- Collaboration and contribution in presenting the slides.

Due Date:

Each pair should send me an email specifying the names of the two partners as well as the chosen topic by **Friday, October 20th**. I will reply to the email either approving the topic or asking you to change it. The presentation should be presented in class on **Wednesday, October 25th**.
