

Department of Electrical and Computer Engineering  
 Faculty of Engineering and Architecture  
 American University of Beirut  
**Course Information**

**Course title:** Introduction to Electrical and Computer Engineering

**Course number:** EECE 200

**Catalog description:**

Overview of electrical and computer engineering; engineering as a profession; introduction to the different areas of ECE such as biomedical systems, circuits, communications, computer design, control, distributed systems, electromagnetics, energy, machines, and signal processing; basic computer tools such as SPICE, MATLAB, and LabVIEW; basic laboratory instruments; laboratory experiments and design project.

**Credit hours:** 3 credits

**Required or elective:**

Required for CCE / ECE students

**Prerequisites:**

By course: None

By topic: High school mathematics and physics.

**Textbook(s) and/or required materials**

R.M. Ford and C.S. Coulston, “Design of Electrical and Computer Engineers, “ McGraw-Hill International Edition, 2008

**References:**

**Course Objectives**

| <i>The objectives of this course are to:</i>  | <i>Correlates to program objectives</i> |
|---|---|
| Introduce students to the engineering profession  | 3,4                                     |
| Provide students with an overview of engineering ethics   | 4                                       |
| Present to the students the various areas of electrical and computer engineering                              | 1,4                                     |
| Introduce students to some basic mathematical and computing tools used in electrical and computer engineering | 2                                       |
| Foster effective communication and teamwork skills among students   | 3                                       |

### Course Topics

| No. | Subjects covered  | 50 min. lectures |
|-----|---|------------------|
| 1   | Introduction to different areas of engineering  | 2                |
| 2   | Mathematical Skills (Complex numbers, number systems)   | 2                |
| 3   | Engineering as a profession (engineering analysis and design, engineering ethics, engineering project management, professional communications, IEEE)  | 11               |
| 4   | ECE areas (circuits & electronics, power, renewable energy, communications, electromagnetics & radio frequency, signal and image processing, computer hardware, software, networks & distributed systems, control, machines, and biomedical engineering.) | 11               |
| 5   | Introduction to ABET  | 1                |
| 6   | ECE tools (PSpice, LabVIEW, MATLAB, Library resources)  | 4                |

### Laboratory Topics

| No. | Experiment Topic   | lab session (3 hrs) |
|-----|--|---------------------|
| 1   | Introduction to MS Office  | 1                   |
| 2   | Introduction to SPICE  | 1                   |
| 3   | Introduction to MATLAB   | 1                   |
| 4   | SPICE/ MATLAB application on engineering problem                                       |                     |
| 5   | Library resources and information sources usage  | 1                   |
| 6   | Getting familiar with LABVIEW  | 1                   |
| 7   | Getting familiar with LABVIEW DSP module and SPEEDY-33 Analog and Digital Applications | 1                   |
| 8   | Introduction to Robotics   | 1                   |
| 9   | Audio Effects using LABVIEW and SPEEDY-33  | 1                   |
| 10  | Communication Systems using LABVIEW and SPEEDY-33                                      | 1                   |
| 11  | Image Processing using LABVIEW   | 1                   |
| 12  | Design Project (Hardware and Software implementation and integration)                  | 3                   |

### Course Learning Outcomes

| At the end of the course, students:  | Correlates to program outcomes* |     |     |
|--|---------------------------------|-----|-----|
|  | H                               | M   | L   |
| 1. Have a realistic understanding of the different engineering profession and the working environment of engineers | (f)                             |     | (h) |
| 2. Understand engineering ethics and are familiar with the IEEE code of ethics                                     | (f)                             |     |     |
| 3. Understand engineering problem-solving concepts and   |                                 | (e) | (a) |

|  |     |     |                    |
|--|-----|-----|--------------------|
| principles   |     |     |                    |
| 4. Demonstrate an understanding of the engineering design process including problem formulation, constraints, alternatives, prototyping and testing  | (c) |     |                    |
| 5. Have developed an awareness of challenges occurring in teamwork (Task division, communication skills...)  |     | (d) |                    |
| 6. Appreciate the importance of project planning and scheduling  |     | (k) | (e)                |
| 7. Have developed presentation skills  | (g) |     |                    |
| 8. Are able to recognize and locate reliable sources of information (library, web...)  |     |     | (i) (k)            |
| 9. Are aware of the various areas of electrical and computer engineering: circuits & electronics, power and renewable energy, communications, electromagnetics & radio frequency, signal and image processing, computer hardware, software, networks & distributed systems, control, machines, and biomedical engineering. |     |     | (h) (j)<br>(n) (o) |
| 10. Are introduced to several engineering software that will be utilized in the coming years (Spice, MATLAB, and MS Office)  | (k) | (g) |                    |
| 11. Are familiar with the use of LabVIEW as a programming and design tool  | (k) |     |                    |
| 12. Have learned proper project management and documentation   | (k) |     |                    |

\* H: High correlation, M: Medium correlation, L: Low correlation

### Class/laboratory schedule

- a- Two 50-minute lectures per week.
- b- One three-hour lab session per week.

### Resources of the course

Reference books, online references, Lecture material, Lab manuals, Clickers.

### Computer usage

LabVIEW, PSpice, MATLAB, MS Office, Email/Web, Moodle.

### Evaluation methods

|                                   |              |            |
|-----------------------------------|--------------|------------|
| 1. Midterm                        | 20%          | individual |
| 2. Computer Lab Assessment        | 15%          | individual |
| 3. Homework assignments (2)       | 2 x 3% = 6%  | individual |
| 4. Labview Quizzes (5)            | 5 x 3% = 15% | individual |
| 5. Project                        | 35%          | teams      |
| 6. Lecture Quizzes and Attendance | 8%           | individual |
| 7. Assessment of course outcomes  | 1%           | individual |

**Professional component**

Engineering topics: 95%

General education: 0%

Mathematics and basic sciences: 5%

**Preparation and Revision**

Prepared by Ayman Kayssi in September 2006

Revised by Ayman Kayssi in January 2009

Revised by EECE 200 Ad-Hoc Committee in June 2009

Revised by EECE 200 Ad-Hoc Committee in November 2012

Revised by EECE 200 Ad-Hoc Committee in August 2013
