Sample Text

If I were you doing this exam, here is what I would do.

- First, I would divide this page into rows and columns to identify the tables in here.
- Once done, I will create these tables and fill them with the text that you see.
- Then, I will create an external style sheet file and link it to this file.
- Then, I will start creating classes as required and assign them to the text and elements in here.

This is just a sample text used for filling up space in here. **Note that this text is justified**. This is just a sample text used for filling up space in here. **Note that this text is justified**. This is just a sample text used for filling up space in here. **Note that this text is justified**.This is just a sample text used for filling up space in here. **Note that this text is justified**.
